

Milestone 1 (\$100) - Trial Consultation & Planning: This is a trial milestone to assess mutual fit, working style, and expertise level before proceeding with the full project.

- Review current course outline and provide improvement recommendations
- Select 5-10 popular practical automations for development
- Rank automations by complexity and integrate into course outline
- Create detailed implementation plan for each automation
- Share your student teaching strategy and content delivery approach
- Demonstrate your communication style and project approach

Milestone 2 (\$1,000) - First 5 Automations (Beginner-Intermediate): Proceeding only after successful completion of Milestone 1

- Build 5 complete end-to-end automations from A to Z
- Create step-by-step screen recordings for automation
- Provide screen recordings of the entire development process
- Comprehensive testing and troubleshooting guides

Milestone 3 (\$1,500) - Advanced Automations:

- Develop remaining 3-5 more complex automations
- Integrate all case studies into comprehensive course structure
- Create final course materials and advanced student guides

Milestone 4 (\$1,000-1,500) - Finalization & Launch Support:

- Test and refine all created solutions
- Provide launch support and initial student Q&A guidance

Total Budget: \$5,000
